|--|--|
| <i>SME Name</i> | Synelixis Solutions Ltd. |
| <i>Web Site</i> | www.synelixis.com |
| <i>Contact Email</i> | zahariad@synelixis.com |
| <i>Topics of Interest</i> | ICT-17 (RIA), ICT-19 (RIA) |
| <i>Expertise / Added Value brought by the SME</i> | Synelixis is a member of SONATA and 5GTANGO projects in 5G PPP Phase 1 and 2, respectively. In SONATA, Synelixis is responsible for developing and integrating a monitoring framework that fulfils the requirements to accommodate 5G network services under the SDN/NFV paradigm. The implemented monitoring framework defines an open-source, non-intrusive, flexible and modular mechanism able to follow rapidly changing VNFs and NSs and produce real-time and event-driven alerts at different customizable aggregation levels/rules. |
| <i>Additional comments e.g. with respect to Phase 3 and the recommendations from the pre-structuring model or any other comments</i> | For Phase 3, Synelixis is willing to collaborate towards the expansion of the framework with respect to requirements posed by different verticals, while also seeking for opportunities to promote the company service portfolio via the 5G ecosystem. |

Note: the NetWorld2020 European Technology Platform, the SME Working Group, and the To-Euro-5G support project who is supporting both, cannot be held responsible for the information in this form, that has been collected from the SME.
