SME Success Story – April 2019

IS-Wireless

IS-Wireless (SME, Poland) has successfully contributed to the *5G Essence* project where the company is working on a centralized radio resource management for the cloud-RAN solutions in the two-tier cloud networks (especially multi-RAT scheduling for 4G and 5G networks). Moreover IS-Wireless is currently together with the Thales (France), ORION (Greece) and other partners working on planning the public safety showcase for demonstrating the benefits of 5G mission critical applications in coexistence with centralized RAN. The final demonstration of the *5G Essence* as regards “mission critical” will be presented during the B-APCO conference (in UK) on 13-14 November 2019, shortly before the project finalizes. IS-Wireless is working on the delivery of a complete software defined (SD) RAN solution to be showcased next year.
